

**HOPSHARVESTER™**

Balers

B20, B100

Make 20 or 100 lb bales easily and affordably with a B20 or B100 hop baler. Small farms now have an effective way to package hops after drying and to conserve cold-storage space when preparing delivery to brewers or processors. These hydraulic balers can be powered by tractor, shop supply, or power unit, and are built to be easily shared and transported between farms. The B100 baler may be set up with a feed-conveyor for high-volume production.

Standard Features:

- Hopper for manual feed with safety lock-out
- Free-swinging doors for easy bale removal
- Stowable hydraulic press-head for transporting
- 25-ft long hydraulic hoses

B20:

- Produces 20 lb bales, or partial bales with insert
- Full bale-size: 16"W x 18"D x 12"H
- Accepts standard poly/burlap sheet or corrugated box
- Machine dimensions: 3'W x 2'6"D x 10'H (6'10"H stowed)
- (Optional) Integrated digital scale

**B20**

B100:

- Produces 100 lb bales, or partial bales with insert
- Full bale-size: 24"W x 24"D x 48"H
- Accepts standard poly/burlap bags
- Hoppers for manual and conveyor feed
- Controls for operation from floor or platform
- Machine dimensions: 2'8"W x 4'D x 11'7"H (4'9"D x 9'H stowed)
- (Optional) Integrated digital scale
